Hi Valerie-

Thanks for your note earlier this afternoon.

Here is the manuscript that Tony submitted for Recent Advances in Tobacco Science. This is the paper that TSRC organizers invited him to submit and he will also present this information at the symposium held the first day of the conference.

Subject: TSNA review

Dear Kathy,

The suggested changes by both reviewers (R. Kinser and W. Hempfling) were made to the manuscript. I have also deleted 'Worldwide Scientific Affaires' from the address. In addition, the three Figures were improved and the reference list checked against the original literature. Some minor typos in addition to those found by the reviewers were corrected in the text. E. Sanders has also re-read the corrected review draft and made a couple of minor changes to the text.

Ted has now signed and approved the MRB form. I now hope that the attached review is in a form fit for submission to Recent Advances in Tobacco Science.

Best regards,
Tony
